ONLINE LEAGUE DYNASTY

FBFL Player & Commissioner Instructions

ONE LEAGUE. SHARED MARKETS. ONE OFFICIAL RESULT.

Create a shared FBFL competition, claim programs, play one authoritative schedule, recruit from a league-wide prospect pool, use one offseason Transfer Station, communicate through the League Board/DM system, and advance through a multi-season league.

QUICK START

Normal sign-in -> Game -> Online Leagues -> Create/Join -> Claim program -> Shared recruiting -> Submit plan -> Resolve official result -> Commissioner advances -> Shared Transfer Station in offseason.

1. What the Online League Shares

- One season year, phase/week, schedule, standings, official results and championship history.
- Human program claims; unclaimed standard FBFL schools stay CPU controlled.
- One shared recruiting class and interest market.
- One shared offseason Transfer Station and interest market.
- Persistent shared league signees/talent context.
- An 8-team postseason playoff after the shared regular season.
- League Board, private coach-to-coach DMs, blocking/reporting and commissioner moderation.

**PERSONAL
DYNASTY STAYS
PERSONAL**

Your detailed solo/classroom roster, history and three personal save slots are not overwritten by Online League membership.

2. Create or Join

- 1 Use a normal permanent signed-in Liquid Football account. Offline and anonymous Classroom sessions cannot create/join leagues.
- 2 Open Game -> Online Leagues. Create a league or enter an existing League Code.
- 3 Commissioner sets league name/abbreviation, difficulty, management toggles and maximum human coaches. The current code accepts 2-26 humans; CPU programs fill the rest.
- 4 Claim one available standard FBFL program. A program can be controlled by only one human coach in that league.
- 5 Share the League Code only with intended members.

3. Weekly Competition Workflow

Step	Action
1	Review current league week/phase, opponent, standings and coaches.
2	Use available shared recruiting actions and manage personal Dynasty systems separately.
3	Submit the required weekly game plan for your human-controlled matchup.
4	Resolve the shared result when required human plans are present.

Step	Action
5	Commissioner resolves ready/CPU games as needed.
6	Commissioner advances only after every game in the current round is complete.

A completed shared game is authoritative for league standings. A separate score from a personal Dynasty does not replace it.

4. Shared Recruiting and Transfer Station

- Shared recruiting uses one prospect pool for all human and CPU programs. The first eligible program to reach 100% wins the commitment.
- Human coaches receive 3 recruiting pitches in a regular/postseason league period and 12 during the offseason period.
- The shared Transfer Station is locked until OFFSEASON.
- When open, humans and CPU programs recruit from the same transfer pool; a transfer signs once, with the first program to reach 100%.
- Human coaches receive 12 offseason transfer contacts.
- A shared player placed into the Transfer Station immediately leaves that program's shared talent group and can sign elsewhere.

5. League Board and Direct Messages

Feature	Current behavior
League Board	General Discussion, Scheduling, Game Results/Trash Talk, and Commissioner Announcements.
Threads/replies	Members can post/reply; commissioner tools can pin/lock where supported.
Private DMs	Text-only coach-to-coach messages inside the same league with unread indicators.
Block / Report	Members can block DMs and report specific board content or a specific DM message.
Commissioner moderation	Reports inbox plus temporary Board mute/DM suspension controls.
Privacy boundary	Commissioner does not receive blanket access to private conversations; a reported DM copies only the reported message into the report record.

6. Shared Season and 8-Team Playoff

- The current Online League configuration uses 12 regular-season games.
- The shared schedule covers all standard FBFL programs, with unclaimed programs CPU controlled.
- After regular-season completion, the postseason uses an 8-team playoff.
- League history stores champion, runner-up and championship result.
- After the title, the commissioner advances through OFFSEASON and into the next season; shared markets/history continue.

7. Commissioner Responsibilities

- Create the league and distribute the invitation code.
- Confirm coaches claim intended programs.
- Allow weekly plans and shared-market actions before advancing.
- Resolve ready/CPU games when needed.
- Initialize/repair shared markets only when they are genuinely missing.
- Do not advance until current-round games are complete.
- Do not leave OFFSEASON until coaches have had time to finish shared recruiting/transfer activity.

- Moderate board/reports without treating private DMs as commissioner-readable conversations.

8. Troubleshooting

Problem	Meaning / action
Sign-in required	Use a normal permanent account, not anonymous Classroom Mode.
Program already claimed	Another human controls it in this league.
Cannot resolve	Required human game plan may still be missing.
Advance blocked	At least one current-round game is incomplete.
Recruit pitch unavailable	Period limit reached or prospect already committed.
Transfer Station locked	League has not reached OFFSEASON.
Board/DM missing	Communications SQL/current HTML may be missing, or account is not a permanent league member.
